3.1. Bonita BPM Engine .....	5
3.2. Bonita BPM Portal .....	5
3.3. Bonita BPM Studio .....	5
4. Related Links.....	7

## 1. General

### 1.1. Product version

6.0.3

### 1.2. Date of release

5<sup>th</sup> September 2013

### 1.3. Target audience

This document is for technical users of Bonita BPM.

## 2. Technical changes

### 2.1. Configuration changes

- **forms-config.properties:**

A new property "form.generation.auto" was added to the file forms-config.properties (located in BONITA\_HOME/client/tenants/<tenantID>/conf and BONITA\_HOME/client/platform/tenant-template/conf).

To turn off automatic form generation with the engine variables, you need to set this property to "false" (or remove it).

## 3. Bugs fixed

### 3.1. Bonita BPM Engine

#### Summary

- BI-289 DocumentValue not found for jasper connector
- BS-115 Client API in HTTP mode each request will create a new connection and recreatemarshallers
- ENGINE-1713 Message not caught and execution stopped when using message event in call activity
- ENGINE-1720 UndeclaredThrowableException thrown if server side exception not handled
- ENGINE-1721 ClassCastException with engine's HTTP API
- ENGINE-1722 When trying to create a profile with an already existing name, unfriendly error
- ENGINE-1723 Terminate End Event doesn't abort Loop, or MultiInstance
- ENGINE-1724 Engine fails to start with bundle, JTA issue
- ENGINE-1725 Custom implementation fails if directly used in a form widget in a subprocess

### 3.2. Bonita BPM Portal

#### Summary

- WEB-2362 bad performance between 2 human steps when redirectToURL is used
- WEB-2711 absence of synchronization between Portal and Form App regarding tasks assignation
- WEB-2768 The "locale" variable is hard coded with the value "en"
- WEB-2796 Changing labels and tooltips for Add/Remove buttons for File widget
- WEB-2830 Security of process variables in application mode
- WEB-2840 "Define the return URL as a parameter" doesn't have any effect
- WEB-2894 The redirect to URL script doesn't find variables
- WEB-2913 Multiple select widget is not well displayed when "add" is clicked
- WEB-2930 Task taken by clicking "Do It" can be taken by another user.
- WEB-2935 Organization export generates corrupted xml file with special character
- WEB-2936 Remove widget tooltip is not in the form.xml
- WEB-2950 Cannot log in as technical user after creating new tenant
- WEB-2974 return to process after Redirect Url cause 404 Error: executeactionsservice not found

### 3.3. Bonita BPM Studio

#### Summary

- BS-128 Creating form from a list of data changes the order of data in the list
- BS-142 Message not caught and execution continues when using message task in call activity
- STUDIO-512 List of groups in memberships drop down list is not reordered after adding a new group
- STUDIO-519 Test Button should not be enabled on connector selection dialog if some required fields of connector configuration are empty
- STUDIO-1173 Cannot display form if task's name contains Unicode characters
- STUDIO-1429 user does not know where export was done
- STUDIO-2289 'content is not allowed in prolog' message is incomprehensible when introspecting void url

- STUDIO-2349 [Configure]: the "Cancel" button should be located on the right side of the "finish"
- STUDIO-2446 Have icon menu entry after studio installation on Ubuntu
- STUDIO-2483 after try of an import of a community workspace during subscription wizard installation, infinite loop and pc has to be restarted due to install folder problems
- STUDIO-2500 Changing return type of transition condition when selecting java object
- STUDIO-2506 BBPMC-40 TAssociation error occurred in XML during import BPMN 2.0
- STUDIO-2507 BBPMC-44 "Validate" does not validate actions on widgets
- STUDIO-2606 a Checkbox widget is automatically generated for List<Boolean> data
- STUDIO-2610 Configuration process dependencies: jar not added on pool
- STUDIO-2611 Editing operator type of an output operation takes default value again
- STUDIO-2629 [Expression Editor>Comparison]: we say "F1" displays auto complete data, but it doesn't
- STUDIO-2632 Error when migrating from 5.10
- STUDIO-2633 svn: Commit failed: Cannot verify lock on path
- STUDIO-2635 svn + Manual sync: Lock has no effect on Diagram
- STUDIO-2649 Issue with imported process from 5.10 containing Boolean list
- STUDIO-2652 Widget Type non editable when editing a connector definition
- STUDIO-2692 Incorrect wording for Import 5.x import file error
- STUDIO-2718 Mapping of KPI fields to values doesn't work
- STUDIO-2752 Studio path does not support modification
- STUDIO-2782 after some Studio inactivity error "Process execution has failed during deployment " appears when executing a simple diagram
- STUDIO-2790 Many duplicate application dependencies for validators
- STUDIO-2791 Using decision table on a transition causes an error
- STUDIO-2798 Expiration license message is wrong
- STUDIO-2808 Remove look'n'feel options not supported in L'n'F editor
- STUDIO-2809 Look'n'feel menu contains unused option
- STUDIO-2812 It is not possible to use URL parameters in an Action of a redirect URL
- STUDIO-2845 Message correlation does not work for event sub-processes
- STUDIO-2848 Email connector configuration load on new connector validation status error
- STUDIO-2849 Deleting a Widget template result as duplicate it in the tree view
- STUDIO-2852 Webservice connector wizard generates invalid envelopes
- STUDIO-2853 h2 1.3 connector connects but cannot be created (NPE)
- STUDIO-2860 general tab contents disappear when clicking on palette lift
- STUDIO-2863 Some connectors configurations saved are not displayed in Edit Configuration
- STUDIO-2870 Multiple field "iterator" value is being reset
- STUDIO-2585 a non deleted correlation key corrupts normal behavior even if not selected (the key based correlation UI feature, which was not BPM compliant, has been removed. Therefore, before your migrate a process from 6.0.x you should remove this feature)
- STUDIO-2891 Translation are missing in BAM
