

# BUDGETING PROCESS

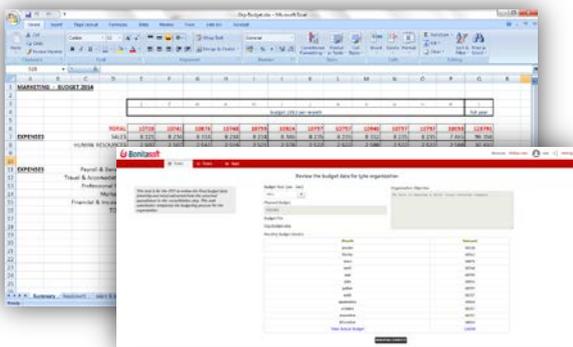

## Be efficient.

- Automatically distribute tasks according to YOUR organization
- Collect and consolidate budgets from all departments
- Don't eliminate Excel - use it efficiently
- Connect to your existing IS to avoid duplication

Whether you are a CFO, purchasing director, controller, or accountant - the Corporate Finance processes you manage are critical to the day-to-day operations of your organization.

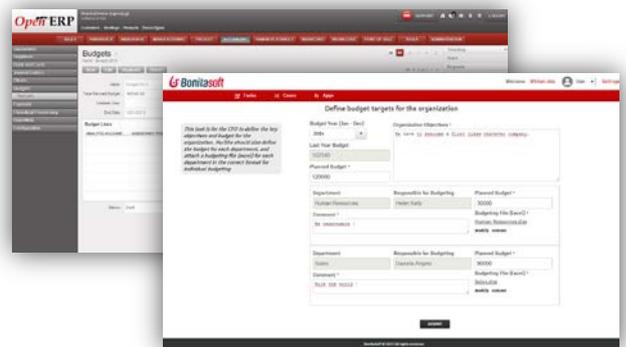

The budgeting process is a substantial exercise imposed every year on every organization. And it is too often a nightmare for everyone involved.

## Validate and read Excel files

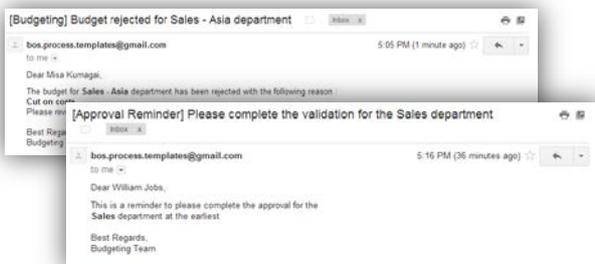

Excel™ is one of the most widely used tools for budgeting. Improve your usage by automatically soliciting, collecting, versioning and validating the content of your Excel files.

## Connect to your ERP

Entering the same data in multiple places is very likely to introduce errors (not to mention a pain) in the budgeting process. See how Bonita BPM connects easily to your favorite ERP.

## Alert and remind

Alert users when an action is required, and define deadlines for reminders to make sure your budgeting process is not stuck.

## Monitor key milestones in budgeting

Track key milestones by department to accurately report budgeting progress.

# Process templates – easy to start, easy to extend

A process template is a pre-built, optimized business solution, built using BPM best practices to accelerate your project and reduce the time to implement.

- Download it from the Bonitasoft Customer Portal and import it directly into Bonita BPM Studio.
- Start with the template, and customize it to your specific needs. All the source code is provided.
- Access to all process templates comes with Bonita BPM *Efficiency* and *Performance* Subscriptions.

## The Budgeting process template

The *Budgeting* process template follows recursive budgeting process:

- The CFO defines budgets and goals for the coming year.
- Excel files for budget calculations are automatically sent out to all managers responsible for budgeting.
- At each level of the organization, the manager can define department goals.
- Budget managers upload their budgets in the Excel format, and the system validates it.
- Managers validate their team's budget inputs.
- The CFO consolidates and validates the company's budget.

## Other process templates

### Employee Leave Management

Approve and manage requests for time off, insure clear communication about absences, and maintain business continuity when employees are away.

### 360 Customer Support

Manage your customer support along with the growing use of mobile services, changing user habits, and the wide variety of information systems in use today.

### Onboarding

Bring value to the entire business through HR process automation. Align your onboarding process with the corporate strategy of reducing costs through increased efficiency.
